## Provider Profile

---

Information provided by the provider describing their agency:

As a clinical Social Worker, I currently provide therapeutic services to individuals, families and groups with a focus on the development of an individual's ego strength, living skills and internal structure reprogramming. The modalities used include; Dialectical Behavioral therapy, Behavioral plans, Hypnotherapy work, narrative work, meditation and muscle tension relaxation techniques. I want to teach my clientele that self-mastery of their body also leads to mastery of their dys-regulated and unpleasant emotions.

Before any therapeutic work can begin, an assessment and interview process for the sole purpose of formulating an in-depth individual psychosocial report of the family history, intergenerational patterns and significant events that played a role in the interpersonal psychic and the presenting behaviors of the individual will be performed. A family system will undergo a similar process to assess dynamics and maladaptive skills playing a role in the deterioration of their relationships.

In preparation for the termination phase of their treatment, I am equipped with 5+ years of assertive and aggressive accessing/researching skills community providers to provide a continuum of care. I will refer and connect them to community resources that can aid in the attainment of their daily living needs if deemed appropriate. I am well versed in the eligibility requirements of benefits for many of these community resources. If need be, I will develop and implement therapeutic behavioral treatment plan for individual and or families that will aid in the transition process back to their respective communities and homes.

Current population served includes clients with Borderline personality disorder, depressive disorders, social anxieties, mood disorders, conduct disorders and developmental/ cognitive delays.
